

DK CARNIVORE SAUSAGE

Complementary feed for carnivorous animals, such as: Lions, tigers, hyena's, bears, wolves, birds of prey, vulturus and other small and large carnivores

Especially developed to prevent problems with dosing of supplements. When using a powder supplement there is always a risk of losses and overdosing. This sausage, with highly concentrated vitamin and mineral levels, makes it easier to dose the supplement for individual animals in a more controlled manner.

Features and Benefits of DK Zoological Carnivore Sausage

- * Meat based sausage with highly concentrated supplement
- * Designed to supplement meat and whole prey
- * Structure enables exact dosing of supplement
- * Developed in conjunction with specialised veterinarians and leading nutritionist
- * Meets the requirements of carnivorous animals based on the most recent information from the FEDIAF and NRC guidelines

Feeding Guide

Feed 100 g of DK Carnivore Sausage per 1 kg diet as fed. Because of the high concentration of vitamins and minerals, this is a sufficient amount to supplement for all the necessary vitamins and minerals. The sausage can be fed separately from the diet, for example during training or before feeding.

Feeding the supplement separately to individual animals enables exact supplementation of the diets, based on the animals' specific needs.

Product Form & Storage advice

20 x 500 g sausage

This product should be stored in a cool dry place, refrigerate after opening.
