

# FLAKED BEET PULP

Complementary feed for a variety of herbivorous animals

## Features and Benefits of DK Zoological Flaked Beet Pulp

- \* Excellent source of easily fermentable fiber
- \* Pectins have a probiotic effect, which improves gut health
- \* Fast soaking compared to non flaked beet pulp - ready in 15 minutes!
- \* Free of molasses, low sugar content (7%)
- \* Stimulates moisture intake

## Preparation instructions

Add 5 liters of water to 1 kg of flaked beet pulp. Let it soak for +/- 15 minutes. Please make sure that it is completely soaked and soft before feeding, **never feed the dry product!**

## Feeding Guide

DK Flaked beet pulp is a complementary feed to increase the (fermentable) fiber level of the diet. Can be fed as an addition to roughage like lucerne and/or hay.

Depending on the total diet, feed a maximum of 0,5 kg per 100 kg body weight.

## Product Form

Flaked pellets packed in 20 kg bags

## Analysis (as is)\*

Moisture	%	10,6
Protein	%	9,0
